

cellsense[®] PLUS

The best cell phone, weapon & contraband detector.

Portable, full body screening in a single walk-by

Most sensitive to cell phones and small blades

Fast, effective & versatile

Putting you ahead in your fight against contraband

Effective – detects all phones, concealed contraband, even small blades

- 2x sensitivity of detection, for the smallest concealed contraband*
- Enhanced detection zone focused on subjects' most challenging concealment areas
- Cuts interference from surrounding activity, 50% fewer unwanted alerts*

Versatile – works in every setting of the correctional facility

- Adapts instantly for portable or wall-mounted searches
- Works indoors and out

Immediate – portable and operational by one person in less than 15 seconds

Robust – resistant to breakage and weather, backed up by the best warranty in the industry

Cellsense enables fastest walk-by searches. Uniquely versatile Cellsense with its detachable base performs portable or wall-mounted searches anywhere in the facility, including outdoors

By addressing gaps in traditional security systems, Cellsense Plus adds a new layer in your fight against inmate contraband:

Effective

- Detects all cell phones, on/off, with/without batteries, even mini key fob phones, concealed on or inside the body
- Detects weapons, lighters, small blades and other contraband that can be missed by traditional systems
- Doesn't alert on items of non-interest like most jewelry, joint implants and stationary metal objects such as cell doors
- Safe for searching all subjects, including those with a pacemaker or pregnancy. Cellsense does not create any emissions or health concerns

Portable and instantly deployable

Screen subjects without their knowledge with covert searches behind walls

Unit profile is less than 6cm from the wall

Versatile for Screening People

Deploy Cellsense to prevent smuggled contraband entry and use throughout the facility. Adapts instantly between freestanding or wall-mounted with unique detachable base

Outdoors, Cellsense works in rain and snow with a 16 hour battery.

In the dining hall, use Cellsense to thoroughly search 40 inmates per minute in a simple walk-by.

Versatile for Screening Objects

Deploy Cellsense vertically, horizontally or at any angle for 360° screening

In the accommodation units, Cellsense performs the fastest and most effective bedding search. Slide mattresses under Cellsense to detect the smallest contraband.

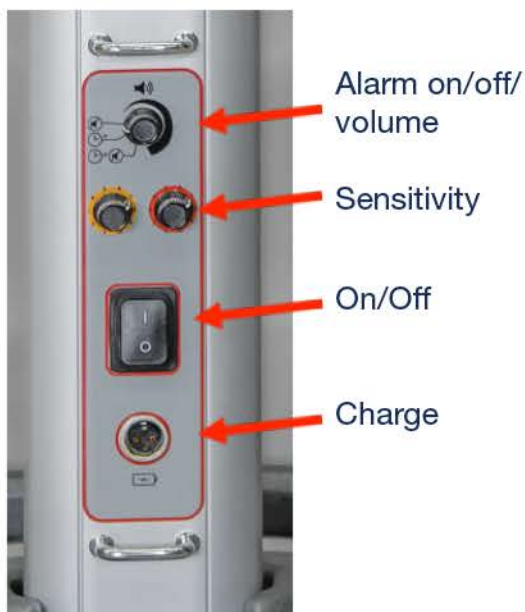

Cellsense will detect contraband within laundry.

Immediate

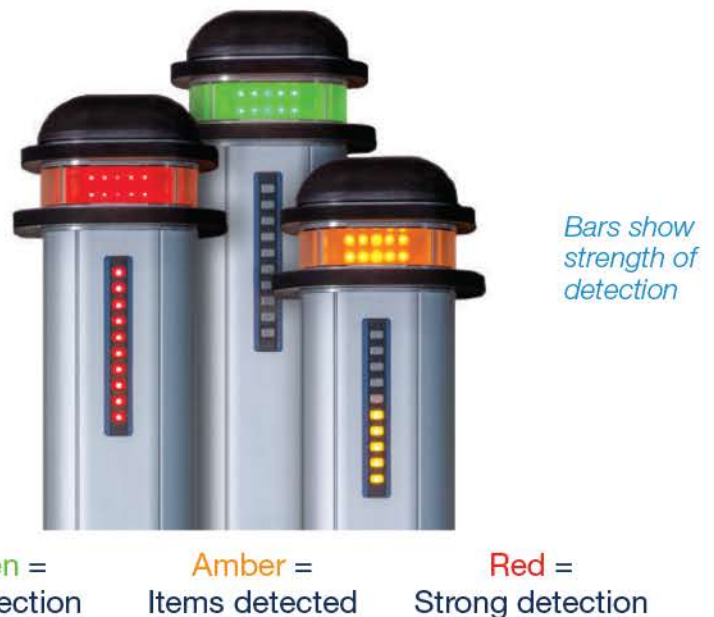

Fast and simple for your busy Staff

With Cellsense, there are no complicated dials, controls, or displays. No waiting around for the system to calibrate, and no user input is required. Setup in less than 15 seconds and start your search.

Simplest Controls

Clearest Display

Cellsense Uses

- Prevent contraband from entering the facility
- Prevent use of contraband within the facility

Search Locations

- Reception
- Checkpoints
- Transport
- Line Searches
- Mail & Packages
- Visitors
- Work Crew
- Staff
- Bedding

Assembled sensor & base unit	18kg 39.7lb	187cm 73.6"	34cm 13.4"	34cm 13.4"

* Mount Cellsense to the wall with Metrasens-supplied bracket #2045

We found Cellsense to be an excellent piece of equipment, especially the fact that it is mobile and easy to assemble at short notice in any location. It is useful in the detection of mobile phones and weapons on inmates, and limit the movement of contraband around the prison as inmates would be aware that a search with this scanner could take place at any time.

– Irish Prison

Cellsense is working for us. The staff think it is great and we are keen to let other forces see it in operation.

– Inspector Barry Sweeny,
Gloucestershire Constabulary, UK

We have used this scanner on a number of occasions over the past few weeks. It's an excellent piece of equipment. The fact that it is mobile and easy to assemble anywhere at short notice would make this a valuable tool in the detection of mobile phones and weapons on inmates.

It could also deter prisoners from moving phones around the prison as they would be conscious that a search with this scanner could be waiting for them around the corner.

– Irish Prison

We have found screening inmates as they return from visits, exercise and court appearances really beneficial in stopping contraband entering the prison. Staff have found the pole easy to use and have started to use it for screening other goods entering the prison.

– UK Prison London

We have been using the Cellsense portable detector which resulted in a mobile phone being recovered. The phone was one of the really small LZ phones which are very hard to detect using our normal metal detectors.

– Irish Prison

A fantastic piece of equipment, quick and easy to deploy a great asset for some of our search operations.

– Scottish Prisons Search Team

Staff were impressed as to its accuracy and also to the fact that it is portable.

– Irish Prison
